*Secrets of the Pulse* Singing Dragon  
 The area of Ayurveda known as Panchakarma is a comprehensive system of knowledge and practices to purify the body of toxins and restore it to balance with natural law. This book reflects the way the original text of Ayurveda, the Charak Samhita, first presented this knowledge. The first section explores in detail the principles which define Ayurveda as a science of life and health. The second section delves more deeply into the Ayurvedic understanding and how to treat it. This section begins with an elaboration of six stages of disease formation and then systematically unfolds the knowledge of Panchakarma, the

science of rejuvenation.

Dr. Svoboda's original work on the constitutional types in Ayurveda has been considered a classic for many years. His new revision and expansion of the subject comes after much further research and practical experience. Dr. Vasant Lad points out: "The healing science of Ayurveda is based totally upon the knowledge of "prakriti," the individual constitution. If every individual knows his own constitution, then one can understand, for instance, what is a good diet and style of life for oneself. One man's food is another man's poison. Therefore, to make one's life healthy, happy and balanced, the knowledge of constitution is absolutely necessary."

The term yoga has many traditional meanings. In Ayurveda, the medical science of India, yoga refers to the right usage and right combination of herbs. A special combination of substances designed to bring about a specific effect upon the body or mind is thus called yoga. This coordinated or integrated usage of herbs is based upon the ancient Ayurvedic science of herbal energetics. This is a system for determining the qualities and powers of herbs according to the laws of nature, so that herbs can be used objectively and specifically according to individual condition. A yogic usage of herbs implies such an harmonic application of the potencies of herbs. In this book, for the first time, this Ayurvedic herbal science is applied to western herbs, as well as to a few major oriental herbs, both Indian and Chinese. It is the purpose of this book not to present Ayurveda in the distance, as some-thing foreign or anci-ent, but to make it a practically applied syst-em of herbalism. This book is just a presentation of traditi-onal Ayurvedic know-ledge. It attempts to show living Ayurveda, its creative and practical application to changing conditions. It is meant as a bridge between east and west. In this regard, it has been a collaboration of an easterner with profound knowledge of the west and a westerner with profound knowledge of the east.

Dr. Vasant Lad, a leading authority in this field, has created an invaluable guide to treating common ailments and chronic problems with strategies tailored to your personal needs based on your dosha. The Marmas (Vital points) are very sensitive, tender and vulnerable points in human body. Injury to them leads to deformity or even to death. Therefore, the knowledge of the Marmas is very essential for physicians and surgeons. This book is an attempt in this direction. Based on 54 verses of *Suśruta Saṃhitā Sārira*, Chapter 6, it explains the Ayurvedic concept of Marmas, along with their various types, location in the body, nature, their size, anatomy, physiology, pathology and possible treatments. It also tries to correlate the Ayurvedic Marmas with the vital points in other alternative systems of medicine—Yoga, Unani, Siddha, Homoeopathy and Acupuncture.

Thousands of years ago Ayurveda described multiple levels of the radial pulse that could be used to interpret the status of the organs and systems of the body as well as the mental and physical constitutions of the individual. For the first time in the west this book presents this ancient art and provides a method by which anyone can learn to read his or her own pulse.

Imbalances and potential disease states can be detected in their early stages, giving one the opportunity to correct them before they affect the quality of life. With practice and guidance, one can acquire the proficiency to use this knowledge to heal self and others. This book will give guidelines to think about various ways of feeling, reading and gathering information through the pulse. It is quite difficult to put subjective experience into words. It is an attempt to express these simple ways of feeling the pulse.
